Budget Execution for First Quarter

Budgeted Costs vs Actual Costs

Cost Account Heads

These are sample charts shown here

What is Variance?

Variance determines just by how much percentage we are still missing or haven't met the target. This also determines by how much we have exceeded it.

Formula

$$\left[\frac{(\text{Actual} - \text{Budgeted})}{\text{Budgeted}} \right] \times 100$$

Revenue Variance

- 0% or positive variance is the best, because 0% means we have reached the target
- Positive value means we achieved more than how much we set out as a target.

-100%

- completely missed the target; **replan**

-51% to -99%

- achieved less than half of target; **bad**

-1% to -50%

- achieved more than half of target; **good**

0% and more

- completely achieved the target or have exceeded the target;
very good

Expense Variance

- 0% or negative variance is the best, because 0% means we have estimated our budgeted expense accurately and we followed our “maximum allowable cap”.
- Negative values means we saved money compared to how much we allotted for the expense.

-100%

- saved up on expenses, **good!**

-1% to -99%

- completely did not spend

0%

- spent exactly how much was budgeted, **neutral**

> 0%

- exceeded the target, **very bad**

	Here we are not using our standard GFB accounts. We are using the sub-expense heads (e.G. GBM COSTS, TRAVEL instead of HR costs) to make it more detailed. Only those heads are mentioned which were a part of our first three budgeted months)

What influenced the expenses during this quarter?

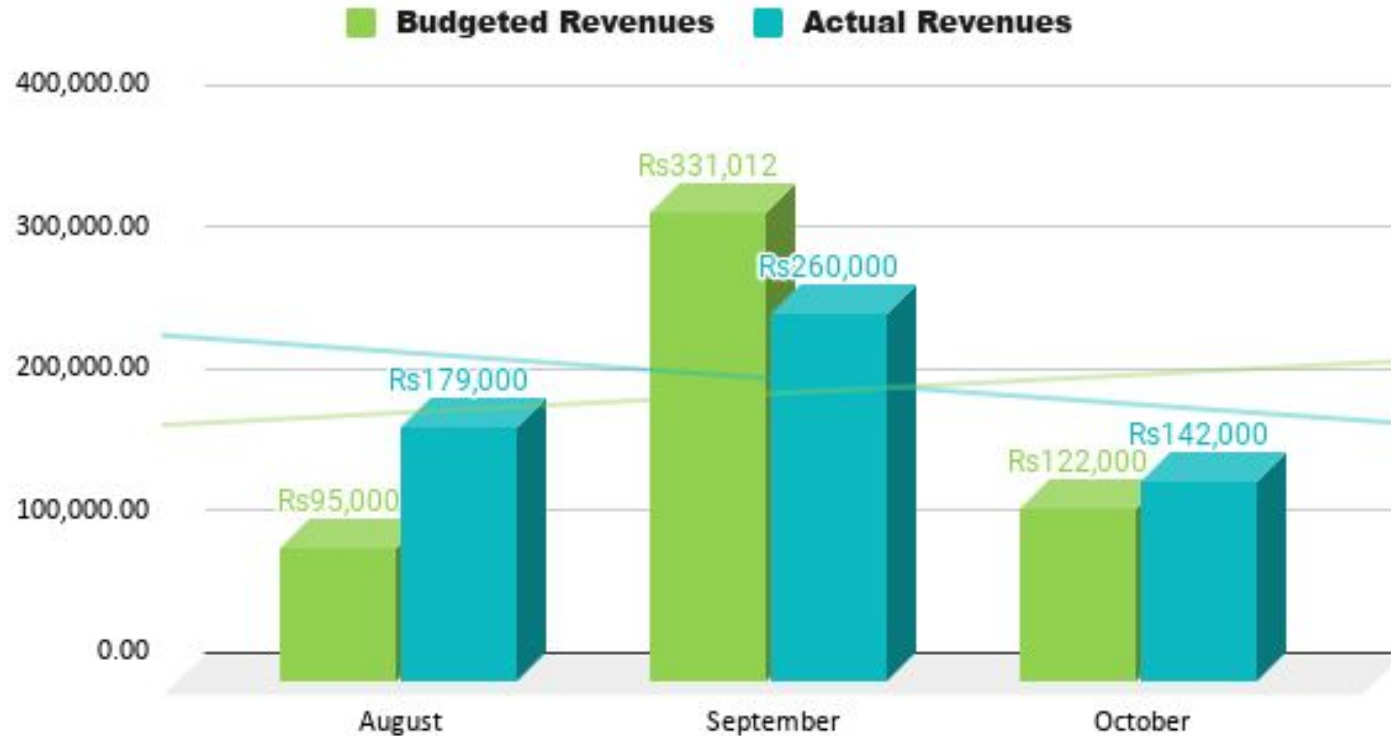

There were not many forces taking a part in influencing our expenses during this quarter as we are still going through a pandemic so the only things that required some expenses included AGM and the induction. So in other words this quarter has been slow.

Key Learnings & Way Forward

- So far 1st quarter has been good expense wise as we have only got negative variance.
- Keeping the pandemic in mind, we should keep our expenses to the minimum.

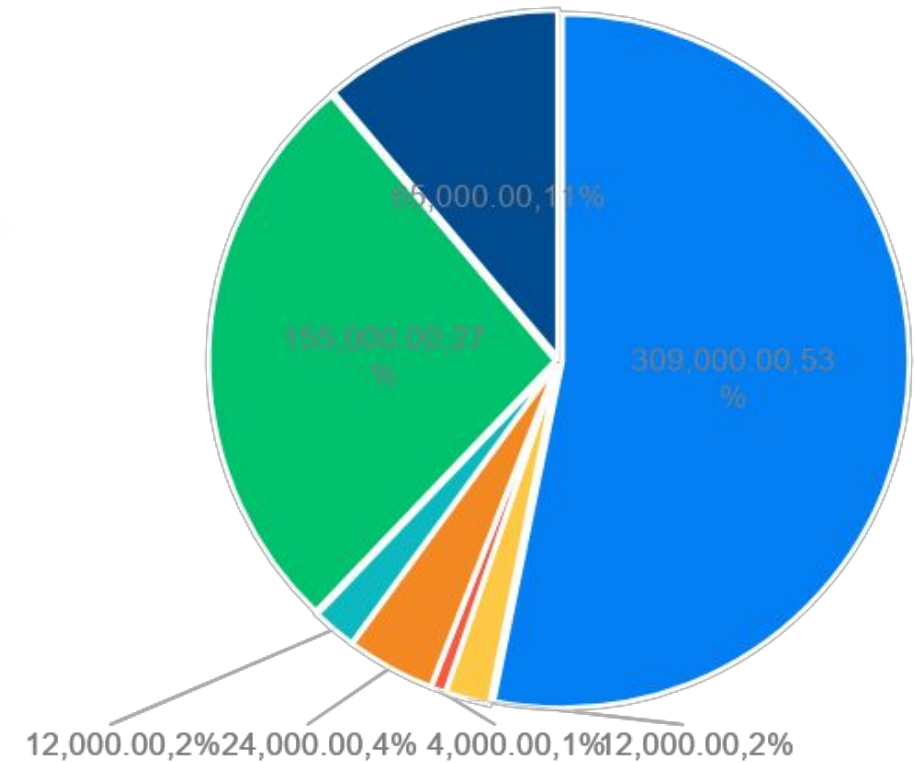

Budgeted Revenues vs Actual Revenues

TOTAL REVENUE	52,000 PKR	345,000 PKR	293,000 PKR	563.4%

What influenced the revenues during this quarter?

The pandemic also effected our revenue streams in a big way, as we expected things to be better this time around but due to COVID they did not go as planned and there was a very big fall in the budgeted revenue.

Key Learnings & Way Forward

- As the revenues took a hit, we should move towards cost cutting approach.
- Looking for other revenue streams would be first priority.
