context & background

why mx funnel?

being unclear in stages of a customer journey would lead to the failure of delivering our value proposition as organization and of the program itself.

-  the difference between a good HR with Employee (Member) Experience and a not good one is about how much detailed, insightful yet simple journey they define
-  if the stages are unclear, we cannot do a good tracking or asking the right question to understand the insight behind member actions
-  if the stages are unclear, we cannot define what should be the Product standards need to deliver for each stage
-  like any product, all elements and operation are built to develop leadership

why the refreshment?

after some years from the official mx lunch as a programm we had the opportunity to gather feedback and understanding better the mx development in each of the entity, and in order to fulfill it's value proposition, the funnel has been refreshed.

how we designed it?

- 1** gathering feedback and GCP from the global plenary and external stakeholders;
- 2** aligning operational timeline & KPIs to the membership ones;
- 3** aligning member's activities during their journey to the funnel;
- 4** understanding the flexibility needed due to different membership experiences contexts and processes around the world.
- 5** decide the essential stage and every stages must be designed clearly in:
 - what happen at that stage
 - before enter each stage, what are the state of member
 - at the end of each stage, what are the KPIs we want to see
 - what will be our actions to move member from this stage to the next stage

key changes

what are the key changes?

- adaptability of the funnel to different realities
- definition of the **advanced** phase
- definition of the funnel phases that concerns both the recruitment and the advancement phase

direction

member's journey

transition

from **lead** to **approved**

the transition phase starts with the talent planning and the brand attraction. In the transition phase, the person faces the onboarding into the new role *[both new members & people applying for higher position]*.

It's a stage in which this person starts to be in touch with the context of aiesec and its role, understands the environment and what could be its own unique contribution to it.

transformation

from **realization** to **completed**

during the **realization** phase, the member is experiencing the role, the benefits, ups & down, the leadership and personal development of the experience itself. It's called transformation in order to describe the changes that a member goes through.

*this phase officially finished when a member is **finished** or **completed**.*

advancement

advanced

the advancement phase aims to enhance the retention rate & turnover of member pipeline.

the previous two phases should facilitate and enhance the advancement phase, in which a member feels the need to keep contributing applying for higher role or transversal role (at the end of the experience, or during the same).

*all the phases apply no matter the length of the membership experience (short, medium or long).

 **mx funnel**

membership length

short

short experience
short experience
short experience

membership experience that lasts
for **2/3 months**

medium

medium experience
medium experience
medium experience

membership experience that lasts
for **6 months**

long

long experience
long experience
long experience

membership experience that lasts
for **12 months**

*all the experience goes through the same funnel, just with different timelines that it's based on the EY's needs and processes..

phase where you can find the stage of the funnel

stage of the funnel

explanation of the stage of the
funnel and it's difference between
recruitment and advancement
- *if needed*

stage of the funnel

explanation of the stage of the
funnel and it's difference between
recruitment and advancement
- *if needed*

transition phase

lead

#LEAD is the number of people intend to apply for specific position or joining AIESEC

#LEAD can tell us if the Talent pool is enough to fulfil into needed position or should we find more potential talents

They are called LEAD when:

- ✓ They show the interest for the higher position (through national surveys or different official platforms)
- ✓ We know where are they to attract & nurture (sign up on aiesec.org or specific CSR platform).
- ✓ In some case, we have basic info of them (referrals)

applicant

They are called applicant when:

#APPLICANT is the number of people officially submit the application for desired position

#APPLICANT is when a leads begins any first stage of the recruitment process (depending on the EY's process).

- We need to have strategy for Brand Attraction - Targeting campaign and LEAD nurturing activities to convert #LEAD into official #APL
- One applicant can apply for many applications (different durations, entities, team,...) - Which means #.application can be higher than #applicant

transition phase

accepted

#ACCEPTED is the number of people GET ACCEPTANCE for the position/ role they applied.

- It's called an #ACCEPTED when the Applicant go through selection process and meet the criteria we set, as well as be allocated into their suitable position in the structure (both for the recruitment and/or the advancement phase).

- If they fail for joining AIESEC/ the position, we will put the status **#REJECTED** for them (Features on EXPA will be released & updated with you in the future)

approved

After getting acceptance for the role, this people need to go through a preparation process to get ready for the role.

It's called #APPROVED when member is READY TO START the Realisation (ready to perform, ready to engage and develop leadership with AIESEC)

- This number could tell if we fulfil #Ideal HR for the org. or not.

We can define a member approved from the 1st MX Standard deliver to them,

2

selection & allocation

3

onboarding & capacity building

transformation phase

realization

- #REALISATION is the number of member STARTING THE MEMBER EXPERIENCE. In MXP, member could have more than one Realisation at the same time depend on how many position they get Accepted.
- #REALISATION is counted by the **first day of work of the member** (the first practical activity done in the role covered - receiving capacity building is NOT considered the first day of work).
- Timeline of Realisation is the base for MX department to calculate and plan for all activity timeline of our MX Operation .

This number could tell us:

- ✓ When is the peak of Realisation and we can do backward planning to calculate when is the peak of Applicant - Accepted - Approved
- ✓ Based on each duration and the start date of Realisation, we can predict the peak of Finish and Complete to have proper plan preparing for recruitment & Closing MX Standard delivery
- ✓ each stage's experience would contribute and boost the other stages. At the end it would contribute to the total experience of member
- ✓ In order to make this cycle happen, we need to deliver the MX standards for them
- ✓ Failure in delivering a good engagement - performance support - development path for member could lead to **#. Of Break RE** - which could tell us about Retention Rate and Talent pipeline situation of entity and create strategy on how to improve them.

transformation phase

finished

#FINISHED is the number of member finish the minimum duration of their experience, definide by their **last day of work**.

There are 3 duration:

- ✓ Short: 3 months (4 months)
- ✓ Medium: 6 months
- ✓ Long: 12 months

• If they break RE or take a gap in the RE and cannot fulfil the minimum duration, we will count them as #TERMINATED and cannot be count for Completed or called Alumni

completed

It's called #COMPLETED when a member is:

- (I) Finished status on EXPA
- (II) fulfil the LDA survey
- (III) the mandatory MX standards is delivered (survey on platform - feature come in the future).

Until the survey is not present of the platform, we define #COMPLETED if they fill the national closing survey and have debriefed their experience with their direct TL.

alumni

An alumni is someone who is done with the AIESEC XP and had spent the minimum possible time (finished) in a membership experience.

If fired from a role for (insert reasons) such person will not be considered to be an alumni of said entity or team.

We can introduce development opportunities after AIESEC:

- ✓ BD partner opportunities
- ✓ Joining another ELD or engage in EwA activities
- ✓ Introduce to Alumni network

advancement phase

advanced

#ADVANCED is counted when they go back to the Talent pool of AIESEC. This number can tell about the Talent pipeline of the entity and predict #LEAD in next cycle of allocation

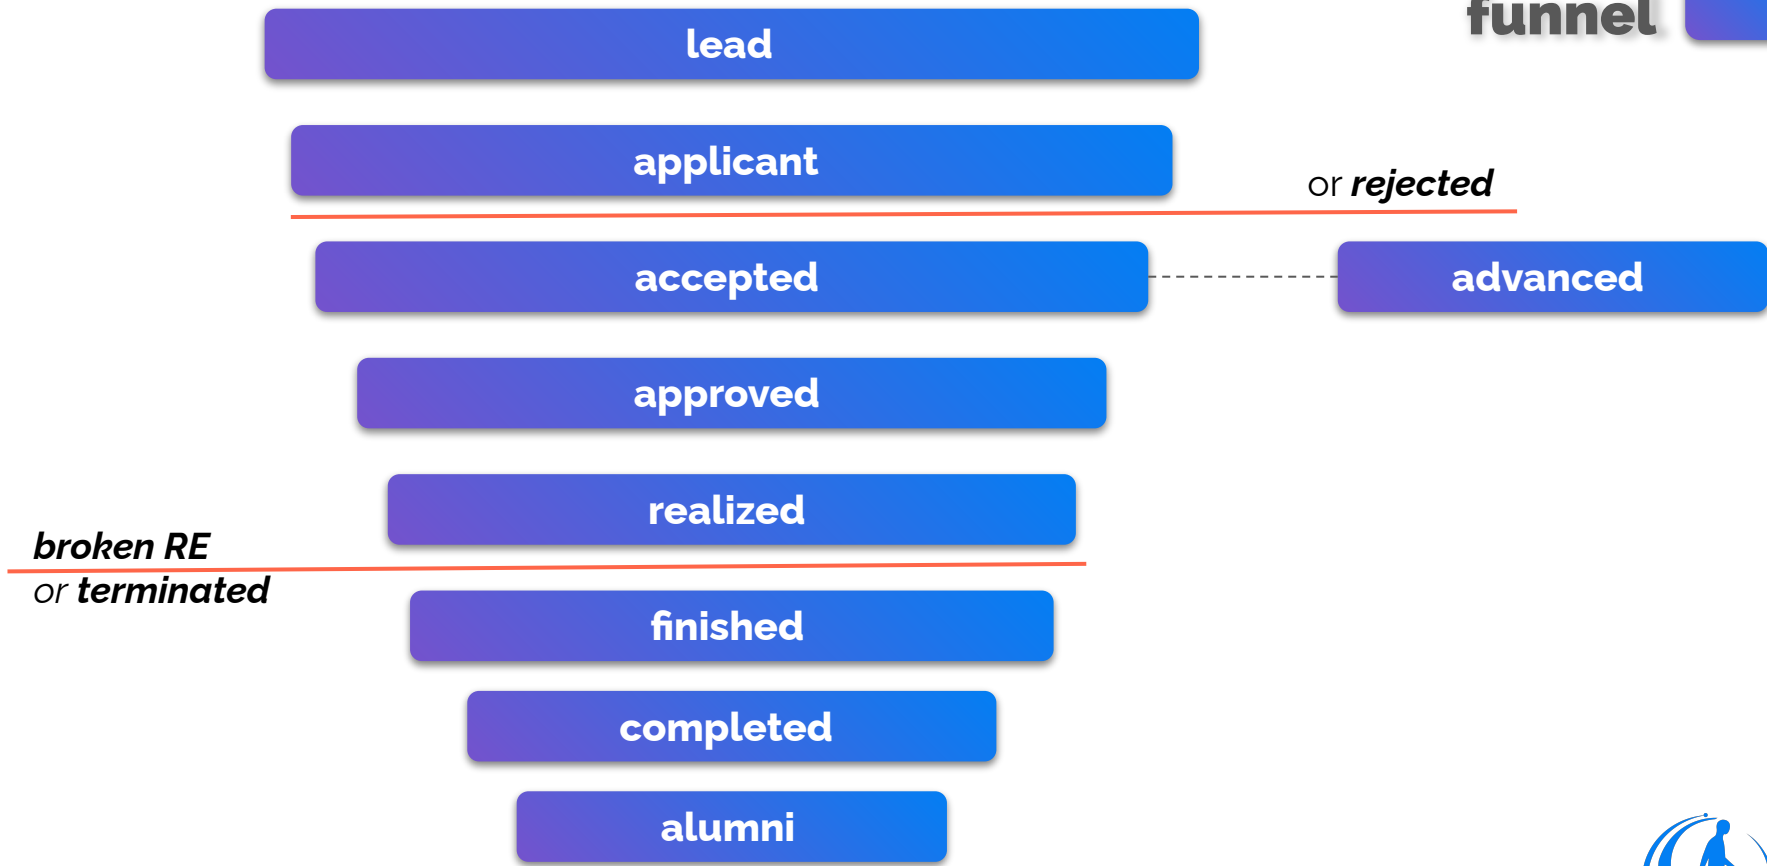

- But it doesn't mean they will always become your #LEAD. Because they can become #LEAD for other positions in other entity, LC,... depend on their development in AIESEC

It's considered advanced when:

- a members has been #accepted for an higher/new role
- it's reterming in a leadership position (TLs, Manager, VP, LCP, MC, ESTs).

If a member finishes it's cycle, and want to reterm in the same role and/or area it's NOT considered advanced. In this case from finished/completed the funnel will start back from approved (in case of changing area, or realized).

*people can leave at any stage of the funnel until **finished**, and doesn't need to have a proper definition, since we can define the problem calculating the conversions from one stage to the next.

conversions & KPIs

conversions | recruitment

LEAD - APL

Defines how out of many people are interested into join aiesec, how many actually starts the recruitment process. From here you can understand bottlenecks and wins of the brand attraction & recruitment process.

APL-ACC

Defines how out of many people start the recruitment process, how many are actually accepted. It can defines the quality and the target of the brand attraction but at the same time, how many people drops out during the process itself.

ACC-APD

Defines how out of many people that has been accepted stay in the organization until they receive their first standard. This conversion can be useful due to the amount of people that leave the organization in the first week but also it's useful to define the process time from one stage to another.

APD-RE

Defines how many people leave the organization during the onboarding period., and how many stays until their first day of work.

conversions | advance

LEAD - APL

Defines how out of many people are interested into new/higher position (that explicit their interest mainly from national membership survey) how many applies.

APL-ACC

Defines how out of many people applied for new/higher positions, how many of those are actually accepted (also depending on how many positions are open).

ACC-APD

Defines how out of many people that has been accepted, finished their transition without withdraw from the role.

APD-RE

Defines how many people finished transition start their official first day of work. Based on the EY timeline, you can plan peaks of RE.

conversions

conversions & KPIs

RE-FI

Defines how many people from their first day of work do not exit until their last. It also defines the retention rate of the EY/LC.

FI-CO

Defines how many people finished their term, how many of those are compliant with the competed standards and requirements.

CO-ALU

Defines how many people with a full experience, decide to leave aiesec (only if they finish their cycle), and how many of those decide to stay in the organization in others or the same role.

main KPIs in each stage of the funnel.

lead

#leads
%leads achieved
#leads per each position
#leads per each MX duration
%contribution of leads per each source

This data could tell us

- Predict if talent pool is enough to fulfil into needed position or not
- Whether we should find more potential talents to ensure #applicant
- Possibly, the application may not qualified due to lack of applicant

applicant

#apl
%apl achieved
#apl per each role and/or area
#apl per each MX duration
#application
#application x APL

This data could tell us:

- How many applicant & application for each position
- How we need to run strategy for Brand Attraction and LEAD nurturing to convert #LEAD into official #Applicant

main KPIs in each stage of the funnel.

accepted

#acc

%acc achieved

#acc per each role and/or area

#acc per each MX duration

#process time lead-acc

(for recruitment)

This data could tell us

- If the initial result of Ideal HR could be achieved
- Did we fulfil all position with enough people or not
- The quality of Accepted member for position is good or not. And what to improve in the upcoming recruitment (Ex: more Applications, better process time strategy, ect...)

approved

#apd

%apd achieved

#apd per each role and/or area

#apd per each MX duration

#process time acc-apd

(for onboarding or transition)

%MX Standards delivery

This data could tell us:

- If we fulfil #Ideal HR for the org. or not
- If we fulfil the MX standard good or not

main KPIs in each stage of the funnel.

realization

#re
%re achieved
#re per each role and/or area
#re per each MX duration
#process time apd-re
(for onboarding)
%MXS Delivery
#NPS & LPS

This data could tell us

- Do we have any member terminate (break RE) or not (retention rate)
- The LPS & NPS is being improved every month / quarter
- If it's improved/not, what are the standards delivered/not delivered
- If it's improved/not, whether the satisfaction, outcome are good/not
- Process time of the onboarding process delivery

finished

#fi
%fi achieved
#fi per each role and/or area
#fi per each MX duration

This data could tell us:

- If member finish the minimum duration of each experience
- Retention rate of organisation after realisation
- How many member finish the experience per position & duration
- What are the reasons make them finished or exit the org.

main KPIs in each stage of the funnel.

completed

#co
%co achieved
#co per each role and/or area
#co per each MX duration

This data could tell us

- If member fulfil the LPS, MX standard & LDA survey
- How many member completed the experience per position & duration
- Whether we actually deliver a good leadership experience or not
- What are the reasons make them completed/ terminated the experience

advanced

#adv
%adv achieved
#adv per each role and/or area
#adv per each MX duration

This data could tell us:

- How many member choose to apply for higher position
- What are the reason behind their decision
- MX standards delivery efficiency and effectiveness
- What are the reason why they applied for an higher position based on duration/ position
- Forecast the structure of the org and it's growth

resources

**STAY TUNED, RESOURCES TO
SUPPORT YOU ARE COMING! 💜**

thank you!

*special recognition to the MX Steering
team 22/23 for working at this project:

AIESEC in Bahrain
AIESEC in Egypt
AIESEC in Hong Kong
AIESEC in India
AIESEC in Italy
AIESEC in Turkey
